- Portuguese (Native)
- Spanish (Working Proficiency)

CHRISTIAN CARVALHO

SOFTWARE DEVELOPER | DATA ANALYST | CYBERSECURITY ENTHUSIAST

PROFILE

Bilingual (English - Portuguese) software developer specializing in AI training data, content policy enforcement, and mobile app development. Experienced in large-scale data annotation, linguistic QA, and Trust & Safety operations across English and Portuguese markets. Proven track record adjudicating policy appeals, contributing structured bilingual decisions to AI model pipelines, and shipping AI-powered mobile products to real users. Passionate about building scalable, bilingual solutions at the intersection of language, technology, and compliance.

WORK EXPERIENCE

Meta

Data Quality Analyst

2025 - Present

Identify defects, edge cases, and recurring quality issues; investigate root causes and recommend improvements. Document quality standards, review findings, issue categories, and escalation procedures. Track quality trends and collaborate with operations, engineering, and cross-functional teams to improve data reliability

X.AI

Linguistic Data Specialist / AI Bilingual Tutor

2024 - 2025

Provided linguistic expertise across syntax, semantics, pragmatics, and sociolinguistics to support the development of multilingual AI and LLM driven language technologies. Curated, evaluated, and refined large-scale Portuguese-English speech and text datasets, ensuring linguistic accuracy, cultural relevance, and consistency across dialectal varieties. Performed high-accuracy audio transcription and linguistic QA for Portuguese speech datasets, ensuring native-level fluency validation and dialect consistency.

Google

Content Analyst - Trust & Safety | YouTube Ads Policy

2023 - 2024

Reviewed and adjudicated advertiser appeals for YouTube ad content flagged for policy violations, covering both English and Portuguese markets. Evaluated video and image-based ad creatives against internal content guidelines to approve or reject appeals with accuracy and consistency. Contributed to AI model training by ensuring all decisions fed into structured English and Portuguese datasets, supporting the development of scalable content moderation systems.

PROJECTS

WCourt - Tennis Social Network

Founder & Mobile Developer

apps.apple.com/us/app/wcourt-tennis-social-network/id6749472566

Designed, built, and published a full-featured social media app for tennis enthusiasts live on the Apple App Store. Integrated conversational AI allowing users to chat with an AI tennis coach for tips, strategy, and match analysis. Built AI-powered video analysis feature enabling players to upload match or practice footage and receive automated performance feedback. Managed full product lifecycle solo: architecture, UI/UX, backend (Python/PostgreSQL), iOS-native components (Swift), and App Store deployment.

Nexoak - CRM Platform

Founder & Full-Stack Developer

www.nexoak.com

Developed a bilingual (English / Brazilian Portuguese) CRM web & mobile application with integrated AI-driven automation. Implemented AI-powered features including chatbots, sentiment analysis, and predictive analytics to enhance user engagement and decision-making.
